

# **Energy Therapy By M.A.R.S.III Radionic Device Effects On The Organic Biochemical Tests Of Patients**

**Fatma El Taweel, Yasser El Naggar, Mohamed El Naggar**

## **Summary:**

This study selected a number of cases which were presented in the study on survey of 2000 cases diagnosed and treated by M.A.R.S.III in the first *Bruce Copen* conference in **Fulda** last year 2006.

Our goals were to explain that M.A.R.S.III had a role in many diseases, this role was not complete in many of them because I was not the only one who treated the case but I was one of number of physicians who treated the disease through a long period of time.

In spite of this, energy medicine -by M.A.R.S.III radionic device which I used for diagnosis and therapy in these cases- improved the pathological changes and the biochemical tests' results during the period of treatment.

Also it gives us an idea about the effect of chemicals like antibiotics, cortisone and cytotoxic drugs which interfere with energy therapy and obstruct or even reverse its effect.
